Providing First Class Custom Design

Features:

- Better engineered for strength and durability (3000-4000# load cap).
- 14 gage top with box welded construction and welded center support.
- 16 gage wrapper with box welded construction.

End Panel and Mouse Hole Covers

One of the most annoying things is trying to hide the holes at the end of banks after it is moved or reconfigured. Our mouse hole covers and end panels simply bolt on the end of your bank for a clean look.

LED Lighting

Add LEDs to the underside of your base bullnose. This is a great way to make your floor or sections of your floor really “POP”. There are several colors of LEDs to choose from so you can set just the right mood in just the right place.

Premier Slot Base - #PR1101
